

Распределите данные, согласно уровням тестирования и характеристикам (одно значение - одна ячейка)

	Test Levels			
	Component Test	Integration Test	System Test	Acceptance Test
Objective of the test (цель теста)	Find defects in the code	Find defects in interactions between components	Find defects in overall functionality	Get confidence that the system is ready to deploy
Who does the testing? (кто выполняет)	Developer	Developer or Tester	Independent test team (usually)	Users, customers, stakeholders
Test Basis (основа)	Program specification, detailed design, data mode	Architectural design for how the code modules fit together	Requirements, risks, use cases and functional design specification	Requirements, risks and acceptance criteria
