

Цикл тестирования

Для каждой из приведенных активностей укажите к какой стадии цикла тестирования она относится (стадий может быть несколько):

Work Product	Activity Group
Automated test script	implementation
Design of test data needed to support test cases	analysis and design
Test progress report	implementation
Test condition list	analysis and design
Test log	implementation
Test suites	analysis and design and implementation
Defect reports	creation of reporting
Test execution schedule	Planning
Test cases and sets of test cases	analysis and design

Action items for improvement of subsequent projects or iterations	ending and debriefing
Design of test environment	analysis and design
Defect reports from dynamic testing	implementation
Test plan	Planning
